Call for Posters
Poster submissions are invited from researchers, developers and innovators from the Regener8 and wider regenerative medicine community.

Posters should reflect the core aim of Regener8, which is to support the translation of university and industry-based research and development in regenerative medicine into commercial products and clinical benefits.

Poster displays offer a more informal setting in which to learn about a wide variety of research, translational and clinical projects. They provide an excellent opportunity for delegates to showcase their own work and receive further recognition.

Poster Prize
Posters will be judged by conference delegates on the day, and there will be a prize for the best qualifying poster from a member of our early career researcher community. All abstracts will be collated and made available to all delegates at the conference.

Guidelines
- Poster abstracts of no more than 200 words should be submitted by email to regener8@horizonworks.co.uk
- Images to accompany abstracts should be supplied separately i.e. not embedded within the abstract document.
- The deadline for submissions is 30 June 2014.
- Poster presenters must also register for the conference. We regret that we are unable to offer complimentary places for poster presenters but there are reduced rates for students.
- Posters should be no larger than A0 size. The display boards will be covered in nylon loop material and you will need to bring your own Velcro tabs to attach your display materials to the boards.
- Poster presenters will be responsible for putting up and removing their posters. Presenters should make themselves available during the conference break times for networking and providing additional detail for poster viewers.
